[SECTION 3 — WHO WE ARE]

Built for Commercial Spaces. Designed to Grow Your Business.

Nearly 20 years ago, Chicago BiFold designed and built its first aluminum bi-fold window for a neighborhood bar in Chicago. The owner wanted to give his guests the feeling of being outside — so we engineered a six-panel, 16-foot-wide accordion window that transformed his space overnight.

Since then, we have manufactured thousands of commercial bi-fold door and window panels installed in hundreds of restaurants, bars, auto showrooms, movie theaters, hotels, and offices across the United States.

We built Chicago BiFold on one principle: commercial-grade **premium looking** should not require commercial-grade markups. By manufacturing directly and selling factory-direct — with no distributors, no middlemen — we give business owners a better product at a better price, with the fastest lead times in the industry.

Four Proof Pillars (icon cards)

PREMIUM QUALITY

Heavy-duty aluminum construction with steel tie-rod assembly — as strong as welded corner construction. Hinges rated to 1,000 lbs. Built to withstand decades of daily commercial use.

ACCESSIBLE PRICING

Factory-direct means you pay manufacturer pricing — not inflated distributor rates. We pass the savings directly to your project without compromising on quality.

FULLY CUSTOM

Every system is engineered to your exact opening dimensions, swing direction, panel count, glass type, and finish. No off-the-shelf compromises — your space gets a solution built specifically for it.

FASTEST LEAD TIMES

Our straightforward design and streamlined manufacturing process means shorter lead times than any major supplier. Every unit is tested at our facility before shipment — so it performs on Day 1.

[SECTION 4 — CHALLENGES / WHY UPGRADE]

Is Your Building Working Against Your Business?

Traditional fixed windows and hinged doors were designed for a different era. They divide space, block light, limit airflow, and create barriers between your business and your customers. In today's competitive commercial environment, your building's envelope is either an asset or a liability.

Pain Points — What Business Owners Are Dealing With

- ✗ Dead patio space you can't use in cooler or windier weather, costing you revenue every week of the off-season
- ✗ Fixed walls and small windows that make your interior feel dark, cramped, and less welcoming to customers
- ✗ High energy bills from outdated, poorly insulated windows and doors that let heat and cold leak in
- ✗ Rigid, single-purpose spaces that can't adapt to private events, seasonal needs, or changing foot traffic
- ✗ Auto showroom vehicles that are hidden behind walls — preventing 24/7 display and impulse drive-by visibility
- ✗ Aging windows and doors that are stiff, unreliable, and increasingly expensive to maintain

Transition to Solution

There is a better way to use your space.

Chicago BiFold commercial bi-fold doors and windows replace every one of these limitations with a system that opens fully in seconds, floods your space with natural light, and transforms your building into a high-performing commercial asset.

[SECTION 5 — WHO WE SERVE]

Whom we are targeting

Restaurant, Auto showrooms, Movie theaters, Co-working Spaces, Hotels & Resorts, Corporate Workspaces, Event Venues, and various other project

[SECTION 6 — WHY INSTALL BI-FOLD DOORS & WINDOWS]

Installing Bi-Fold Doors & Windows Is One of the Highest-ROI Upgrades a Commercial Business Can Make.

Your building's exterior is your first — and most constant — advertisement. Commercial bi-fold doors and windows from Chicago BiFold don't just improve the look of your space. They change how customers experience it, how your team operates within it, and how your bottom line performs year over year.

Business Benefits — Checklist Style

- ✓ Increase usable space without expanding your footprint — open your patio, connect indoor and outdoor, or make one room serve as two
- ✓ Reduce energy costs with insulated glass panels that meet green building and LEED standards for thermal efficiency
- ✓ Improve customer experience with bright, airy, naturally lit environments that increase dwell time and satisfaction
- ✓ Future-proof your space with a flexible, configurable system that adapts to events, seasons, and changing business needs
- ✓ Add lasting property value — commercial bi-fold systems are a recognized capital improvement that increases asset value
- ✓ Ensure fire-rated compliance with our fire-rated aluminum accordion door options — purpose-built for regulated commercial environments

Commercial Bi-Fold Doors

Chicago BiFold commercial bi-fold doors are engineered for one purpose: creating maximum-width, unobstructed openings that connect spaces and transform how your customers experience your business. Built from heavy-duty aluminum with a steel tie-rod assembly that matches welded-corner construction in strength, our bi-fold doors operate smoothly, look exceptional, and last decades.

Key Features:

- Panels fold and stack neatly to one or both sides — creating a fully open, barrier-free opening
- Continuous geared hinges with a load rating of up to 1,000 lbs — lifetime warranty
- Overhead trolleys rated to carry up to 250 lbs per trolley — no floor track required
- Swings inward or outward — configurable to your building and traffic flow
- Available in Clear and Dark Bronze anodized finishes, plus a full range of standard and custom painted colors
- Glass options: 1/4" clear, grey, green-blue, bronze tinted, tempered
- Fire-rated options available for regulated commercial environments
- Fully custom-sized to any commercial opening — no standard panel limitations
- All units tested at the Chicago BiFold facility before shipment
- Ideal for: restaurants, bars, auto showrooms, hotel event spaces, retail storefronts, event venues

Commercial Bi-Fold Windows

Our commercial bi-fold windows bring the same folding-glass versatility to window-scale openings — perfect for restaurant pass-throughs, bar service windows, retail display windows, and office facades. They deliver natural light, ventilation, and an open-air atmosphere without sacrificing security or weatherproofing when closed.

Key Features:

- Accordion-fold panel design — opens fully to create a wide, unobstructed pass-through or view
- Aluminum frame construction — lightweight, strong, and weather-resistant for exterior applications
- Excellent thermal performance — insulated glass options reduce energy costs year-round
- Available in multiple panel configurations to fit any window opening
- Same finish and glass options as our bi-fold door line — ensuring a cohesive look across your facade
- ADA-compliant configurations available
- Ideal for: restaurant and bar pass-throughs, retail display windows, hotel room balconies, co-working spaces, office facades

[SECTION 10 — BEFORE & AFTER]

See the Difference a Bi-Fold System Makes

BEFORE BI-FOLD

- ✗ Fixed walls cut off natural light and make interiors feel closed-in
- ✗ Patio unusable except in perfect weather — revenue lost every shoulder-season day
- ✗ Aging windows leak heat in winter and cool air in summer, driving up energy bills
- ✗ Space is inflexible — one layout, one purpose, no adaptability
- ✗ Showroom vehicles hidden from street view — no after-hours display value

AFTER CHICAGO BIFOLD

- ✓ Floor-to-ceiling glass floods the space with natural light — customers linger longer
- ✓ Fully open or partially open patio extends your revenue season by months
- ✓ Insulated glass panels reduce heating and cooling costs — LEED-compliant options available
- ✓ One space, endless configurations — host events, seat more guests, or partition rooms on demand
- ✓ Vehicles on full display 24/7 — your showroom sells even when you're closed
